

**We are America's, Family
Owned Waste Company.™**

Company Overview

Who is Arwood Waste?

A Full Waste Removal Provider.

Site Equipment Service Provider.

The leader in bringing Technology to the Waste Management and Equipment industry.

Our Operations

AW Waste Management (AW Waste) is an integrated solid waste services company that provides waste collection, transfer, disposal, portable sanitation, temporary fencing and recycling services throughout the US and Canada.

We believe the solid waste service business is a local business managed by professionals living and working in the communities we serve. We strive to provide service excellence for those communities that place their trust in our company and are always dedicated to putting our customers first.

Sustainability – Recycle Guide

We are committed to environmental protection, compliance, and continual improvement of our environmental management system across our organization.

We are guardians of our environment and have a responsibility to regenerate our planet with the materials we are entrusted to handle every day by promoting increased recycling, generating renewable energy, and helping our customers to be more resourceful.

We do this to ensure the viability of our sustainability initiatives because without profitability there cannot be long-term sustainability.

John D. Arwood - Founder & CEO

Getting his start at a young age collecting, reusing, and recycling glass bottles, scrap metals and wood while working alongside his father, John Arwood learned the foundations that have led to over 30 years of success in the waste disposal and sanitation industry.

John Arwood is a forward thinker, innovator, and entrepreneur who cares about the environment and the people around him. Community has always been a priority for John D. Arwood. Through personally funded and inspired initiatives like [National Garbage Man Day](#), [Space Waste Solutions](#), and [The Recycle Guide](#), he continues to seek opportunities to raise awareness and educate about the waste management industry, garbage workers, and environmental conservation.

National Garbage Man Day

In 2014 alone, [National Garbage Man Day](#) received recognition and proclamations from hundreds of state governors, mayors, and city councils throughout the United States. For Arwood, his joy comes from seeing more and more garbage collectors celebrated and appreciated in their communities for the hard work they daily accomplish.

We are America's, Family Owned Waste Company.™

We Look Forward To Doing Business With You

Today, with a clear strategy to serve our customers with integrated services, we continue to lead the waste industry with an innovative business strategy that seeks to create sustainable value beyond the traditional waste disposal model. We view that the services we provide as a resource for building long term relationships, producing renewable energy and as a raw material for manufacturing new products. And, just like our early days, we believe that if the service is good, the enterprise will thrive.
